

MINING & CONSTRUCTION, TRANSPORT & FORESTRY INDUSTRIES

Qtec releases two new products

Part # QTB2012

New Generation ROP Valve QTB2012

This new valve brings new innovation to the vehicle fire suppression industry. With a more efficient design, less weight, and same interchangeable parts as the QTB2000 valve. This new valve from Qtec has delivered a product that brings our quality Fire Suppression Systems to the highest of standards. These are the traits that Qtec Fire are renowned for, quality, reliability, and performance.

New Multi Function Alarm Panel QTB521

With the new Alarm panel you get to monitor, Fire Alarm, Cylinder low pressure and commence an automatic engine shutdown sequence. You have the ability to delay the shut down if required, as well as an audible and visual status displays, with multi directional mounting, multi adjustable delay periods add to the panels features. This panel replaces the QTB506 and QTB507 panels, with functions from both now in the one panel. These are some of the innovative practices you will find with the Qtec products, quality, reliability, and performance. (For AS5062 compliant panels order QTB519)

Part # QTB521
