## Qtec releases three new valves

Part # QTB2012

### **New Generation ROP Valve QTB2012**

This new valve brings new innovation to the vehicle fire suppression industry. With a more efficient design, less weight, and same interchangeable parts as the QTB2000 valve. This new valve from Qtec has delivered a product that brings our quality Fire Suppression Systems to the highest of standards. These are the traits that Qtec Fire are renowned for, quality, reliability, and performance.

Part # QTB917

### **New Generation LOP Valve QTB917**

With the change of the ROP valve Qtec Fire have now taken the LOP Valve into the future with the same interchangeable parts as the MK3 valve, but with the new look and multi function head.

This valve represents another step forward for Qtec with the same high quality, reliability and performance.

Part # QTB950MK4

### **New Generation LPRM Valve QTB950mk4**

All Qtec valves have the same external appearance, with the use of the original MK2 interchangeable parts. This completes Qtec's valves with a unmistakable look and multi purpose function head.
