

9th February 2017

UPDATE 2 - Qtec Foam Statement

The Queensland Government released its foam policy July 7th 2016, since the release of the policy Qtec Fire Services Pty Ltd has worked on conforming to the DEHP policy.

Qtec Fire Services has engaged in second and third party testing for compliancy with the FireAde 2000 and FORREX solutions, for its suitability and requirements to meet the Queensland Governments DEHP Policy.

The product, FireAde 2000 which Qtec Fire Services uses, is compliant under AS5062-2006, with our LOP and ROP systems. We can confirm we are compliant to the DEHP policy as required by the Queensland Government.

Also, our DAFO supplied systems and the FORREX solution which is compliant to SPCR183, P-Mark, SPF127, SPF128, TUV /VDS, Russia N 123-F3, & UL. We can now confirm this product is also compliant to the DEHP policy as required by the Queensland Government.

This means that all Qtec Fire Services Pty Ltd VDAS and DAFO systems designed, manufactured and installed by Qtec Fire services and its dealers as per our design and installation manuals and policies are compliant to the Queensland Government DEHP Policy.

Qtec Fire Services will now be moving forward to complete the Fire testing and other test required to conform with the latest version of AS 5062 standards (AS 5062-2016).

Yours Sincerely

Management Qtec Fire Services
