# Fire Suppression Systems

Qtec Fire Services has released a full range of brass fittings.

Everything from nozzles, hose fittings, tee's, sockets, & elbows.

The use of Brass & Stainless Steel instead of the traditional steel fittings allows the client to eliminate potential rusting problems as seen on typical mining sites.

As always the parts are manufactured to the highest quality and machine processes possible.

We highly recommend the use of these components for both long jeopardy of the system and costs savings.
