Fire Suppression Systems

Qtec Fire Services has released a new gauge colour combination to our QTB 412 gauges range.

Qtec has removed the red colouring from the high pressure >1600kPa side and replaced it with orange of yellow depending on supplier. This colouring was introduced to reduce the likely hood of miss reading of the systems operating range.

The gauges are constructed with Brass & Stainless Steel is to eliminate potential rusting problems as seen on typical mining sites.

As always the parts are manufactured to the highest quality possible.

Gauges introduced 01/05/16
